FASTER SERVICE TIME, MORE COST-EFFECTIVE SOLUTIONS AND MORE INNOVATIVE PRODUCTS

As a drink garnish manufacturer, we have established four important missions to assist bars and restaurants.

SHORTEN THE PREPARATION TIME

The usage of fresh fruit as drink garnish in bars and restaurants is quite high. The preparation time for each order with these fruits is indeed quite long. Another alternative is hours-long fruit drying processes. Frona Drink Garnish products are ready to use in their special packaging. Imagine the time savings it will provide you throughout the day!

REDUCE THE COSTS OF THESE ESTABLISHMENTS

Fresh fruit prices, don't you think they are quite expensive for using them as garnish? Frona grows specially contracted fruits and dries them with geothermal energy after a professional fruit processing process. We pass on the savings we achieve from high volume and energy efficiency to bars and restaurants at affordable prices

SUPPORT THEM IN ENHANCING THE QUALITY OF SERVICE

Firstly, we must emphasize that our products are 100% natural and contain no additives. We slice the fruits specifically for garnish use and dry them using special techniques to ensure they retain their vibrant colour. Another surprise is that after the drying process, we obtain a fruit that is much more concentrated and has a higher aroma compared to fresh fruit. And Now, You can serve a much higher quality product compared to other alternative.

BE INNOVATIVE

Have you ever tried dried passion fruit in your cocktails or drinks? Or had the chance to try Frona's dried orange slices? We can understand the incredible increase in sales speed from the innovation and assistance of our cocktail rimmers, prepared with special flavours and fruit powders, provide for bartenders.

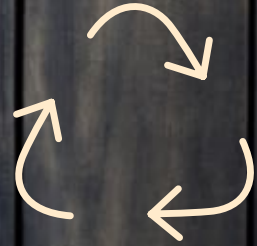

READY TO SERVE

You no longer have to dry your own fruit slices, we've done all the hard work for you
